PROFILE

Data and business systems professional with 5+ years of experience spanning ERP systems, business intelligence and enterprise operations. Hands-on SAP user in both food manufacturing (Taiko Foods: production orders, material and specification data, reporting) and logistics (UPS: order management, contracts, warehouse tracking). At Taiko Foods (London), promoted twice in 13 months, from Production Administrator to Specification Coordinator to Technical Assistant & Business Systems Support, taking on progressively greater ownership of business systems, data and leadership reporting: built automated SQL/Python ETL pipelines, led an end-to-end ERP data migration validating 700+ records, implemented a factory-wide digital compliance platform from scratch, worked hands-on with barcode numbering and testing, and delivered 4 Power BI dashboards that cut audit preparation time by 40%. MSc in Artificial Intelligence (Distinction, University of East London). Comfortable being the link between users, IT and external consultants, picking up new systems quickly, and turning data into clear recommendations for stakeholders from operations to senior leadership.

SKILLS

- **ERP & Enterprise Systems:** SAP (Production Orders, Material/Specification Data, Reporting, Order Management, Contracts, Warehouse Tracking), Point74 ERP, Salesforce, Element Suite, VQMS, TRACS, Barcode Systems, Microsoft 365
- **Data & Analytics:** SQL (Advanced), Python (pandas, NumPy, scikit-learn, TensorFlow), R (Basic), Excel (Advanced, VBA), Statistical Modelling, Time-Series Analysis, Root Cause Analysis, Data Quality Frameworks
- **Visualisation & Reporting:** Power BI (DAX, Power Query), Tableau, Dashboard Design, Automated KPI Reporting, Stakeholder Presentations
- **Data Engineering & Cloud (self-directed/academic):** Azure (ADF, Blob Storage, Synapse), Apache Spark, PySpark, Kafka, BigQuery, Databricks, ETL Pipeline Design, Data Modelling, Data Migration
- **Cross-Functional & Stakeholder:** Stakeholder Management, User Support & Issue Escalation, Vendor/Consultant Coordination, User Training, Requirements Gathering, UAT, Technical Documentation

PROJECTS

- **Predictive Maintenance for Industrial Elevators (MSc Dissertation):** Developed and evaluated deep learning models on real-world IoT sensor data to classify and predict equipment failure ahead of time (F1 0.940, AUC 0.957).
- **CV-Job Matching Web App:** Designed and built an end-to-end tool, integrating an LLM API, that compares a CV against a job description, highlights genuine overlap and gaps, and suggests targeted rewrites, with interview-prep and cover-letter features.
- **AI Product Testing:** Volunteered to stress-test a conversational AI product, probing edge cases and ambiguous inputs to surface failure conditions before release.

More projects, full write-ups and screenshots on my portfolio (linked above).

PROFESSIONAL EXPERIENCE

Jul 2025 - Present: Career break (Jul-Dec 2025) for travel and supporting the family business, continued self-directed learning in cloud data tooling (Apache Spark, PySpark, Kafka), and volunteer media and communications work for my church community since Dec 2025.

Taiko Foods Ltd, London, UK

Jun 2024 – Jul 2025 (13 months)

Promoted twice: Production Administrator → Specification Coordinator → Technical Assistant & Business Systems Support

- Built automated SQL and Python ETL pipelines integrating Point74 ERP, Element Suite, and VQMS, processing daily operational, quality, and financial data across procurement, finance, and QA teams (Technical Assistant).
- Pulled and checked SAP reports to validate operational data, and acted as the link between users and IT/external consultants, raising and following up SAP and business system issues through to resolution (Technical Assistant).
- Worked hands-on with barcode numbering and testing, alongside supporting TRACS, Point74, VQMS and Element Suite (Technical Assistant).
- Led end-to-end ERP data migration, profiled datasets, defined data quality rules, and validated 700+ supplier and product records with full data lineage and cross-functional sign-off (Technical Assistant).
- Implemented the VQMS digital compliance platform from scratch (requirements gathering, UAT, training 50 staff), cutting paper-based processes by 90% (Technical Assistant).

- Designed and delivered 4 Power BI dashboards giving leadership real-time visibility into quality and compliance performance, reducing audit preparation time by 40%, and presented monthly KPI updates to senior leadership (Technical Assistant).
- Performed root cause analysis on supplier non-conformances, distinguishing genuine performance drivers from confounding factors and translating findings into corrective action recommendations (Technical Assistant).
- Used SAP to work with production orders and material/specification data, keeping product and production records accurate (Specification Coordinator).
- Maintained 100% accuracy across supplier and product data in a BRCGS-regulated, zero-error environment; contributed 25–30% of validated records during a Point74 master data infrastructure upgrade, ranking top 3 in throughput (Specification Coordinator).
- Extracted and analysed live machinery sensor data daily, cutting manual reporting by 2+ hours and improving KPI visibility across 3 departments; managed workforce data for 700+ employees and built Excel VBA scheduling tools saving 30 minutes of management time daily (Production Administrator).

Sales Floor Team Member, Marks & Spencer, London, UK

Oct 2022 – May 2024

Held concurrently with full-time MSc studies

- Handled high-volume customer interaction and supported stock accuracy and financial processes at a major UK retailer.

FP&A Senior Administrative Assistant, UPS, Pune, India

Apr 2022 – Aug 2022

- Used SAP daily for order creation, contract management, warehouse tracking, and shipment monitoring across global supply chain operations.
- Prepared financial reports, budgets, and forecasts using SAP and Salesforce data; supported the FP&A team with variance analysis and budget planning.
- Identified scheduling inefficiencies through data analysis and recommended process improvements to operations management.

Accounting and Payroll Assistant, Hotel Kerala Cafe, Pune, India

Jan 2020 – Aug 2022

- Managed payroll, financial records, and month-end reconciliations over 2.5 years.
- Contributed to product development through consumer research and commercial viability analysis.

EDUCATION

MSc Artificial Intelligence, Distinction (77%), University of East London, UK

Sep 2022 – Sep 2023

- Dissertation: Predictive Maintenance for Elevators, LSTM-based classification and regression pipeline on real-world IoT sensor time-series data. Classification F1 0.940, AUC 0.957; Regression MAE ≈13 days. Completed while working full-time.
- Modules: Machine Learning on Big Data (90%), AI and Machine Vision (85%), Big Data Analytics, Intelligent Systems, NLP, Research Methods.

Bachelor of Computer Applications, Distinction (9.96 CGPA), Savitribai Phule Pune University, India *Aug 2018 – Aug 2021*

- Top performer across all cohorts. Modules: Python, R, databases, RDBMS, algorithms, data structures, networks, software engineering. IIT Bombay certified in C/C++ and RDBMS.

CERTIFICATIONS

- Azure Data Scientist Associate (DP-100) Exam Prep (Professional Certificate), Microsoft
- Google Data Analytics Professional Certificate
- IBM Introduction to Data Analytics

ADDITIONAL INFORMATION

- Languages: English, Hindi, Malayalam, Marathi, Dutch (learning).
- Available immediately in Pune. Open to relocation.
